Category Description: Moderate Allocation

Moderate-allocation funds seek to provide both capital appreciation and income by investing in three major areas: stocks, bonds, and cash. These funds tend to hold larger positions in stocks than conservative-allocation funds. These funds typically have 50% to 70% of assets in equities and the remainder in fixed income and cash.

Broad Asset Class: Asset Allocation

Asset Allocation is the apportioning of investment funds among categories of assets such as Domestic Equity, International Equity, Fixed Income and Cash Equivalents.

Notes

This material is authorized for client use only when preceded or accompanied by a Disclosure Statement and a fund prospectus and/or informational brochure containing more complete information. These can be obtained from your investment professional or your plan's website and should be read carefully before investing or sending money.

Morningstar ratings reflect the reduction of the fund's expense ratio. However, your plan may charge an administrative fee and/or plan-level fee, which is not reflected in this rating.

To determine a fund's star rating for a given period, the fund's Morningstar risk score is subtracted from its Morningstar return score. If the fund scores in the top 10% of its respective Morningstar category, it receives five stars; if it falls in the next 22.5%, it receives four stars; a place in the middle 35% earns it three stars; those in the next 22.5% receive two stars; and the bottom 10% get one star.

The Broad Asset Class identifies a fund's investment style. The Broad Asset Class was developed by Nationwide in conjunction with Ibbotson Associates for asset allocation. Asset Allocation does not assure a profit or guarantee against loss in a declining market.
